

4.)

<b>Project Name</b>	AI & Machine Learning based SPAM Filter Development
<b>Client Name</b>	One of our regular client
<b>Industry</b>	Education & Institutional
<b>Challenges (Work)</b>	One of our regular customers wanted to develop an AI +ML based SPAM filter for one of their needs. They reached out to us and discussed their needs with us!
<b>Type</b>	AI+ ML Powered SPAM Filter
<b>Project Duration</b>	1 Week
<b>Outcome</b>	The Tech Stack we used is Python, Matplotlib, Jupyter Notebook, GraphViz and a couple of other tools. Datasets & References were provided by Client. We developed an Email SPAM Filter and Client was very satisfied with our work.
